

/// AUTONOMOUS WORKFORCE MANAGEMENT

AGENTS THAT ACTUALLY WORK.

Stop building chatbots. Start deploying audit-proof, voice-native agents that orchestrate your business logic in real-time.

AI AGENT CONFIGURATION

A unified studio environment for configuring intelligent chatbots. Define identity, mission, and knowledge base sources to ensure your agent represents your brand perfectly.

Knowledge Base

Connect your agent to your company's documents and data. It learns your identity, mission, and services to provide accurate answers 24/7.

Identity & Mission

Customize your agent's personality and voice. Ensure every interaction aligns with your brand's tone and values.

LATENCY IS THE ENEMY.

Why Axie Agents feel human:

1. Real-Like Voices

Powered by ElevenLabs Turbo v2.5
for emotional nuance.

2. Smart Interruptions (VAD)

Using *Voice Activity Detection* and
standard VAD Barge-in, our agents
know exactly when to stop talking
and listen, just like a human.

3. Zero Latency

Optimized edge-transport means
conversations flow naturally without
the "robot pause."

REAL WORLD USE CASE

Customer Service 24/7

"Answering repeated questions
via Knowledge Base."
Agent knows the company
Identity, Mission, Offers, and
Services through and through.

WHY CHOOSE US?

Don't fall behind. Be First.

Industry Standard, utilizing the latest technology to provide the next generation of customer service.

1. Manage **Chat Bots & Agents**

2. Manage **Intelligent Calendar**

3. Manage **Time In & Out**

WE ALSO OFFER ADVISORY

Not sure where to start? We offer "Rådgivning" on how you can use AI as a tool to scale your business. Work with us.

Scale With Confidence.

From single-tenant deployments to enterprise clusters, Axie Studio is built to handle heavy concurrent voice loads without degrading UX.
