

AXIE STUDIO

# YOUR VOICE. THE ULTIMATE UI.

We have deprecated the keyboard.  
Experience the first standalone SaaS  
platform where Artificial Intelligence  
doesn't just talk—it works.

# FLUID INTELLIGENCE

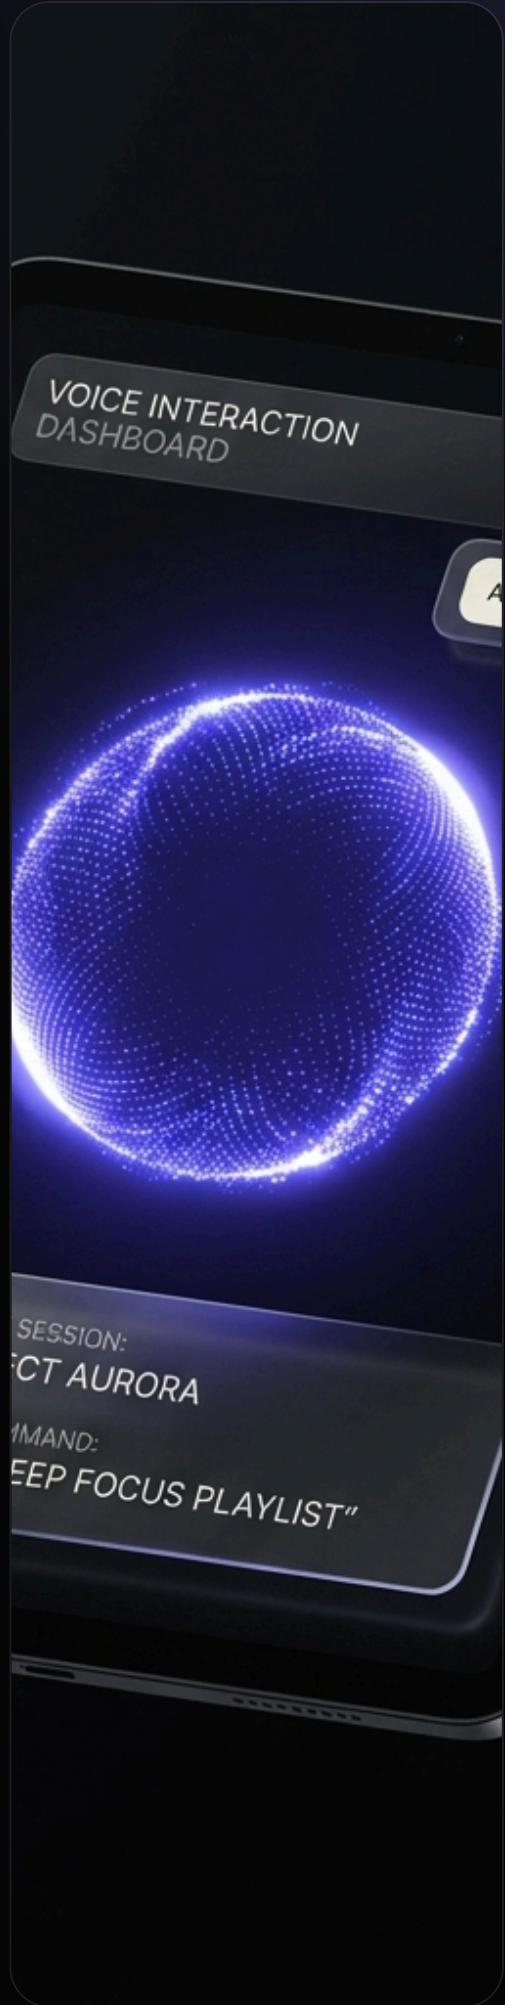

Forget what you know about chatbots. At Axie Studio, we are engineering presence, not just processing.

## **/// INTERRUPTIBLE**

Speak over the AI. It listens instantly. No awkward pauses or robotic turns.

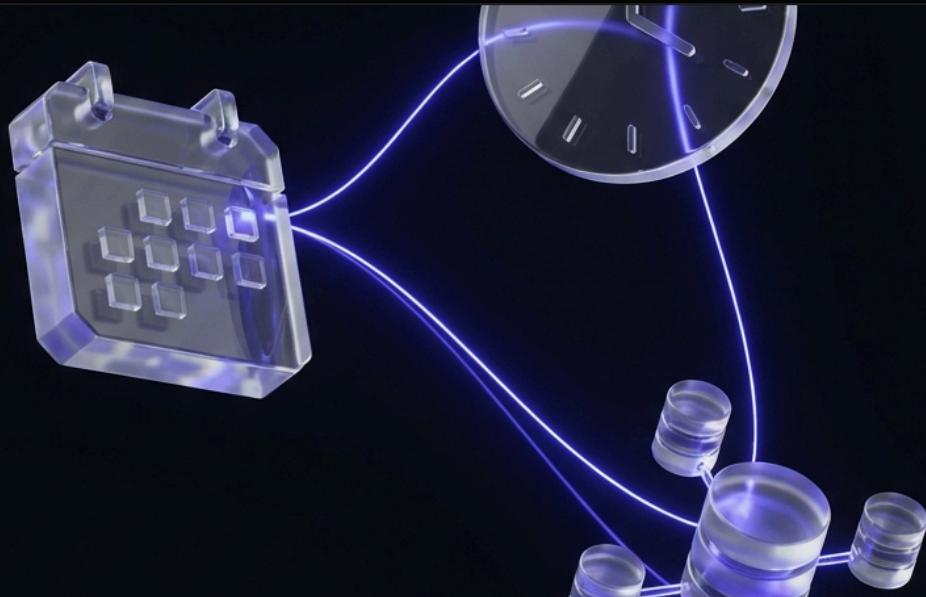

## **/// EMOTIVE**

It understands nuance, tone, and urgency. It breathes, thinks, and converses.

# TOOL CALLING. INTEGRATED.

A voice assistant is useless if it cannot interact with your world.  
Our architecture grants the AI "hands" via secure API Tool Calling.

## Dynamic Calendar Orchestration

01  
Don't just check your schedule—negotiate it.

User: "Find a 2-hour slot for deep work on Thursday."

Sys: Locks slot via API in real-time.

## Time & Attendance

02  
Frictionless workforce management.

User: "Axie, clock me in."

Sys: Auth voice signature, logs timestamp.

## Standalone Ecosystem

03  
No plugins. No Zapier glue. The AI lives inside the database, fully aware of your business logic.

# REDEFINE YOUR WORKFLOW.
